

Articles

- [1] The structure of the ring of intersections of three-dimensional manifolds. (Russian) Doklady Akad. Nauk. SSSR (N.S.) **61** (1948), 795–797
- [2] The classification of continuous mappings of a three-dimensional polyhedron into a simply connected polyhedron of arbitrary dimension. (Russian) Doklady Akad. Nauk SSSR (N.S.) **64** (1949), 461–462
- [3] Homology invariants of continuous mappings. (Russian) Doklady Akad. Nauk SSSR (N.S.) **66** (1949), 161–164
- [4] Classification of the continuous mappings of an arbitrary n -dimensional polyhedron into a connected topological space which is aspherical in dimensions greater than unity and less than n . (Russian) Doklady Akad. Nauk SSSR (N.S.) **67** (1949), 427–430.
- [5] Classification of continuous mappings of an $(n + 1)$ -dimensional complex into a connected topological space which is aspherical in dimensions less than n . (Russian) Doklady Akad. Nauk SSSR (N.S.) **71** (1950), 1027–1028
- [6] Determination of the homology groups of a space by means of the homotopy invariants. (Russian) Doklady Akad. Nauk SSSR (N.S.) **76** (1951), 359–362
- [7] On the homotopy type of polyhedra. (Russian) Doklady Akad. Nauk SSSR (N.S.) **76** (1951), 789–791
- [8] On the classification of continuous mappings. (Russian) Doklady Akad. Nauk SSSR (N.S.) **79** (1951), 573–576
- [9] Definite families of functions and algebras without divisors of zero over the field of real numbers. (Russian) Uspehi Mat. Nauk (N.S.) **9** (1954), 67–104

- [10] Investigations in the homotopy theory of continuous mappings. I. The algebraic theory of systems. II. The natural system and homotopy type. (Russian) Trudy Mat. Inst. Steklov. no. 46. Izdat. Akad. Nauk SSSR, Moscow, 1955. 158 pp. Translated in Amer. Math. Soc. Transl. (2) **7** (1957), 1–134
- [11] Homology theory of smooth manifolds and its generalizations. (Russian) Uspehi Mat. Nauk (N.S.) **11** (1956), 115–166
- [12] Investigations in homotopy theory of continuous mappings. III. General theorems of extension and classification. (Russian) Mat. Sb. (N.S.) **40** (1956), 415–452. Translated in Amer. Math. Soc. Transl. (2) **11** (1959), 115–153
- [13] Squares of classes of contrahomologies. (Russian) Akad. Nauk Gruzin. SSR. Trudy Tbiliss. Mat. Inst. Razmadze **22** (1956), 127–164
- [14] Classification of continuous mappings of an n -dimensional polyhedron into a connected topological space, aspherical in dimensions greater than unity and smaller than n . (Russian) Akad. Nauk Gruzin. SSR. Trudy Tbiliss. Mat. Inst. Razmadze **22** (1956), 165–202
- [15] Homology theory of smooth manifolds and its generalizations. (Chinese) Advancement in Math. **3** (1957), 503–546
- [16] Cubical resolvents. (Russian) Dokl. Akad. Nauk SSSR (N.S.) **118** (1958), 1085–1087
- [17] Limit complexes of cubic resolvents. (Russian) Dokl. Akad. Nauk SSSR (N.S.) **119** (1958), 207–210
- [18] On the fundamental concepts of algebraic topology. Axiomatic definition of cohomology groups. Dokl. Akad. Nauk SSSR **133**, 745–747 (Russian); translated as Soviet Math. Dokl. **1** (1960), 900–902 (with V. G. Boltjanskii)
- [19] The equivalence of cohomology theories. (Russian) Trudy Mat. Inst. Steklov. **64** (1961), 165–172
- [20] Homotopy theory. (Russian) Itogi Nauki (Algebra. Topology. 1962), 107–133. Akad. Nauk SSSR Inst. Nauchn. Informacii, Moscow

- [21] Contemporary Riemannian geometry and its application. (Russian) First Math. Summer School, 257–320, Naukova Dumka, Kiev, 1964
- [22] Calculation of homology (cohomology) groups and homotopy groups. (Russian) Second Math. Summer School, 125–146, Naukova Dumka, Kiev, 1965
- [23] On paracompactness of cell-like polyhedra. (Russian) Uspehi Mat. Nauk **20** (1965), 226–230
- [24] Spectral sequences. (Russian) Uspehi Mat. Nauk **21** (1966), 141–148
- [25] On a theorem of Cartan. (Russian) Uspehi Mat. Nauk **21** (1966), 35–46
- [26] Banach manifolds. (Russian) Fourth Math. Summer School (Kaciveli, 1966), Naukova Dumka, Kiev, 1966
- [27] A certain property of Siegel’s modular group. (Russian) Mat. Sb. (N.S.) **78** (1969), 485–500 (with M. A. Evgrafov)
- [28] A certain property of the Teichmüller metric. (Russian) Dokl. Akad. Nauk SSSR **187** (1969), 1229–1231 (with M. A. Evgrafov)
- [29] The asymptotics of Green’s functions of parabolic and elliptic equations with constant coefficients. (Russian) Mat. Sb. (N.S.) **82** (1970), 3–29 (with M. A. Evgrafov)
- [30] More on the asymptotic behavior of the Green’s functions of parabolic equations with constant coefficients. (Russian) Mat. Sb. (N.S.) **92** (1973), 171–194 (with M. A. Evgrafov)
- [31] Axiomatic homology theory and the Alexander duality theorem. Topics in topology (Proc. Colloq., Keszthely, 1972), 529–531. Colloq. Math. Soc. Janos Bolyai, Vol. 8, North-Holland, Amsterdam, 1974
- [32] Localization of topological spaces. (Russian) Uspehi Mat. Nauk **32** (1977), 117–181
- [33] The mathematical work of L. S. Pontryagin. (Russian) Modern problems of mathematics. Differential equations, mathematical analysis and their applications. Trudy Mat. Inst. Steklov. **166** (1984), 3–17 (with D. V. Anosov, R. V. Gamkrelidze, E. F. Mischchenko)

- [34] Three-dimensional spherical forms. (Russian) Discrete geometry and topology (Russian). Trudy Mat. Inst. Steklov. **196** (1991), 114–146. Translated in Proc. Steklov Inst. Math. 1992, no. 4, 129–161
- [35] Pages of a mathematical autobiography (1942–1953). Golden years of Moscow mathematics, 155–178, Hist. Math. **6**, Amer. Math. Soc., 1993
- [36] The lower Steenrod algebra. (Russian) Uspekhi Mat. Nauk **49** (1994), 187–188. Translated in Russian Math. Surveys **49** (1994), 192–193
- [37] Naturalness and totality of cohomology operations. (Russian) Trudy Mat. Inst. Steklova **224** (1999), 306–310. Translated in Proc. Steklov Inst. Math. 1999, no. 1 (224), 281–285
- [38] The problem of squarable lunes. Translated from the Russian by Abe Shenitzer. Amer. Math. Monthly **107** (2000), 645–651
- [39] On the asymptotics of Green functions of parabolic equations. (Russian) Trudy Mat. Inst. Steklova **236** (2002), 272–284. Translated in Proc. Steklov Inst. Math. 2002, no. 1 (236), 260–272

Books

- [1] Основы теории Галуа [Foundations of Galois theory]. Gosudarstv. Izdat. Fiz.-Mat. Lit., Moscow, 1960. 124pp.
- [2] Англо-русский словарь математических терминов [English–Russian dictionary of mathematical terms]. Editorial board: P. S. Aleksandrov (Chairman), L. N. Bolshev, V. S. Vladimirov, L. D. Kudrjavcev (Vice Chairman), A. F. Leontiev, S. M. Nikolskii, M. M. Postnikov, E. D. Solomencev, I. R. Shafarevich, Izdat. Inostr. Lit., Moscow, 1962. 371 pp.
- [3] Магические квадраты [Magic squares]. Nauka, Moscow, 1964. 84 pp.
- [4] Вариационная теория геодезических [The variational theory of geodesics]. Nauka, Moscow, 1965. 248 pp.
- [5] Введение в теорию Морса [Introduction to Morse theory]. Nauka, Moscow, 1971. 567 pp.
- [6] Аналитическая геометрия [Analytic geometry]. Nauka, Moscow, 1973. 752 pp.
- [7] Теорема Ферма. Введение в теорию алгебраических чисел [Fermat’s theorem. Introduction to the theory of algebraic numbers]. Nauka, Moscow, 1978. 128 pp.
- [8] Устойчивые многочлены [Stable polynomials]. Nauka, Moscow, 1981. 176 pp.
- [9] Группы и алгебры Ли [Lie groups and algebras]. Лекции по геометрии, Семестр V [Lectures in geometry, Semester V]. Nauka, Moscow, 1982. 448 pp.

- [10] Введение в теорию алгебраических чисел [Introduction to algebraic number theory]. Nauka, Moscow, 1982. 240 pp.
- [11] Лекции по алгебраической топологии [Lectures in algebraic topology]. Основы теории гомотопий [Elements of homotopy theory]. Nauka, Moscow, 1984. 416 pp.
- [12] Лекции по алгебраической топологии [Lectures in algebraic topology]. Теория гомотопий клеточных пространств [Homotopy theory of cell complexes]. Nauka, Moscow, 1985. 336 pp.
- [13] Аналитическая геометрия [Analytic geometry]. Лекции по геометрии. Семестр I [Lectures in geometry. Semester I]. Second edition. Nauka, Moscow, 1986. 416 pp.
- [14] Линейная алгебра [Linear algebra]. Лекции по геометрии. Семестр II [Lectures in geometry. Semester II]. Second edition. Nauka, Moscow, 1986. 401 pp.
- [15] Гладкие многообразия [Smooth manifolds]. Лекции по геометрии. Семестр III [Lectures in geometry. Semester III]. Nauka, Moscow, 1987. 479 pp.
- [16] Дифференциальная геометрия [Differential geometry]. Лекции по геометрии. Семестр IV [Lectures in geometry. Semester IV]. Nauka, Moscow, 1988. 496 pp.
- [17] Риманова геометрия [Riemannian geometry]. Лекции по геометрии. Семестр V [Lectures in geometry. Semester V]. Faktorial, Moscow, 1998. 496 pp.
- [18] Geometry VI. Riemannian geometry. Translated from the 1998 Russian edition by S. A. Vakhrameev. Encyclopaedia of Mathematical Sciences, 91. Springer-Verlag, Berlin, 2001. xviii+503 pp

Book translations

- [1] Расслоенные пространства и их приложения [Fiber spaces and their applications]. Collection of translations, edited by V. G. Boltyanskii, E. B. Dynkin, M. M. Postnikov. Izdat. Inostr. Lit., Moscow, 1958. 460 pp.
- [2] И. Капланский, Введение в дифференциальную алгебру [I. Kaplansky, An introduction to differential algebra]. Translated from the English by G. I. Kleinerman; edited by M. M. Postnikov. Izdat. Inostr. Lit., Moscow, 1959. 85 pp.
- [3] А. Картан, С. Эйленберг, Гомологическая алгебра [H. Cartan, S. Eilenberg, Homological algebra]. Translated from the English by E. G. Shulgeifer; edited by M. M. Postnikov. Izdat. Inostr. Lit., Moscow, 1960. 510 pp.
- [4] М. Балдасари, Алгебраические многообразия [M. Baldassarri, Algebraic varieties]. Translated from the English by Yu. I. Manin; edited by M. M. Postnikov. Izdat. Inostr. Lit., Moscow, 1961. 315 pp.
- [5] Р. Мошер, М. Тангора, Когомологические операции и их приложения в теории гомотопий [R. Mosher, M. Tangora, Cohomology operations and applications in homotopy theory]. Translated from the English by M. M. Postnikov. Mir, Moscow, 1970. 287 pp.
- [6] П. Габриель, М. Цисман, Категории частных и теория гомотопий [P. Gabriel, M. Zisman, Categories of fractions and homotopy theory]. Translated from the English by M. M. Postnikov. Mir, Moscow, 1971. 295 pp.

- [7] Дж. Уайтхед, Новейшие достижения в теории гомотопий [G. Whitehead, Recent advances in homotopy theory]. Translated from the English by A. Yu. Geronimus. Edited by M. M. Postnikov. Mir, Moscow, 1974. 128 pp.
- [8] К. Рурк, Б. Сандерсон, Введение в кусочно линейную топологию [C. Rourke, B. Sanderson, Introduction to piecewise-linear topology]. Translated from the English by I. V. Saveliev. Edited by M. M. Postnikov. Mir, Moscow, 1974. 208 pp.
- [9] Дж. Бордман, Р. Фогт, Гомотопически инвариантные алгебраические структуры на топологических пространствах [J. Boardman, R. Vogt, Homotopy invariant algebraic structures on topological spaces]. With an appendix, The geometry of iterated loop spaces, by J. P. May. Translated from the English by S. N. Malygin. Edited by M. M. Postnikov. Mir, Moscow, 1977. 408 pp.
